

# COVID-19 Prevention Plan for Schools

San Ysidro School District

2020-2021

# Plan Template Components

- General Measures
- Promote Healthy Hygiene Practices
- Face Coverings
- Ensure Teacher and Staff Safety
- Intensify Cleaning, Disinfection, and Ventilation
- Implement Distancing Inside and Outside the Classroom
- Limit Sharing
- Train All Staff and Educate Families
- Check for Signs and Symptoms
- Plan for When a Staff Member, Child or Visitor Becomes Sick
- Maintain Healthy Operations
- Considerations for Reopening and Partial or Total Closures

# Hand Washing and Hand Sanitizer

For the Health and Safety of all faculty, students and support staff we are going to install handwashing stations near classrooms w/o a sink: San Ysidro Middle School, Ocean View Hills, La Mirada, Smythe, Smythe CDC and Sunset.

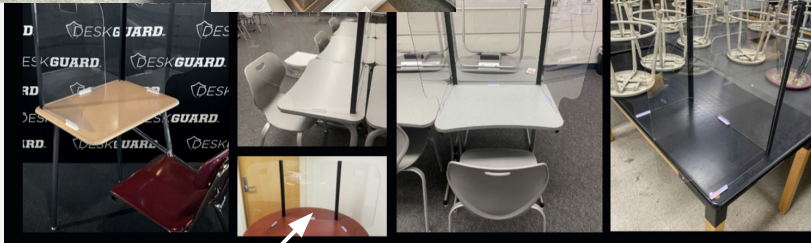

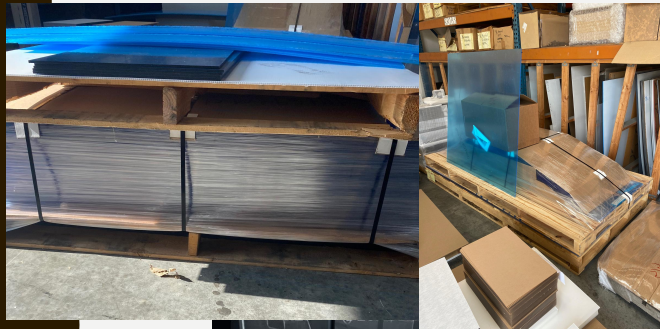

For the Health and Safety we have also placed hand sanitizers in every classroom and have provide all students (3rd grade - 8th grade) Purell hand sanitizing spray.

# Plexiglass Shields

All front offices, conference rooms and classrooms are in the process of installing Plexiglass barriers/shields.

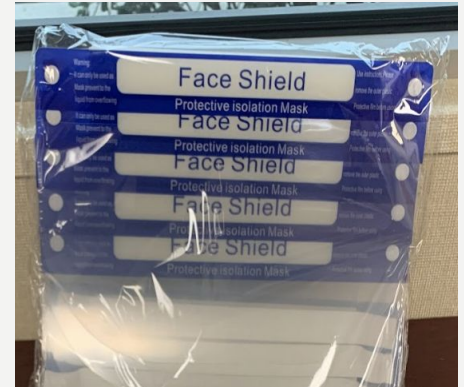

Coming in September!!!

# PPE (Personal Protection Equipment)

We have worked with Business Services, Cabinet and Human Resources to procure and we will continue to work together to purchase the following PPE:

- Disposable Gloves (S, M, L and XL)
- Disposable non-medical 3-Ply face masks
- KN95 face masks (CNS, Health Staff and Isolation Areas)
- Face Shields
- Reusable/Washable Face Masks

# HVAC and Air Scrubbers

MERV (Minimum Efficiency Reporting Value) 13 air filters for central HVAC units. MERV 13 filters capture airborne viruses and bacteria from coughs and sneezes. While there's no guarantee a MERV 13 air filter will protect you from the coronavirus, clean air helps keep your immune system strong.

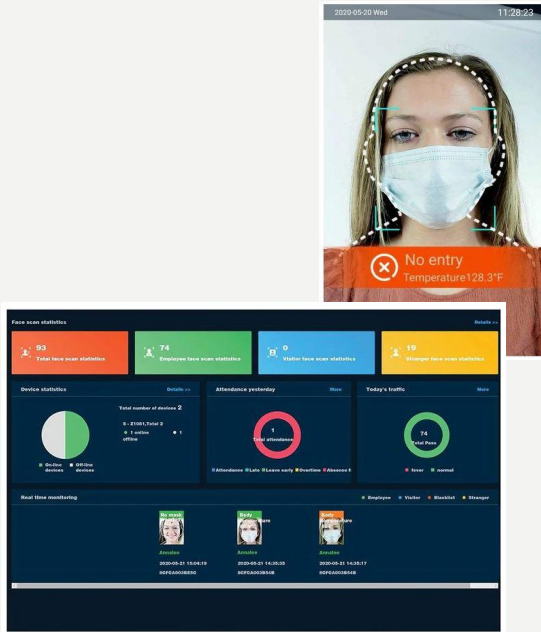

All relocatable classrooms will have a Air Scrubber unit installed with HEPA<sub>1</sub> & MERV 13 air filters.

High-efficiency particulate air, also known as high-efficiency particulate absorbing and high-efficiency particulate arrestance, is an efficiency standard of air filter. Filters meeting the HEPA standard must satisfy certain levels of efficiency.
